

**OPTIMISE YOUR
LEGIONELLA
PROGRAMME
WITH REMOTE
PIPE MONITORING**

An industry-defining partnership

that brings together people, process and technology to tackle your Legionella compliance challenges like never before.

VALUES THAT SET US APART

Rock Compliance is a progressive company in the compliance market who have three fundamental values:

MINIMISING RISK

Continuous proactive risk prevention. We are not here to tick a box but to actively support you while driving down compliance costs.

DELIVERING COMPLIANCE

Transparent and tangible proof of action. A dedication to measuring communicating success delivers true peace mind.

MAKING IT SIMPLE

We question our processes and systems provide an integrated service that leverages best-in-class technology.

Deploy discrete IoT sensors to capture water temperature & movement data 24/7 at touchpoints across your locations

Expertise via a nationwide network of 200+ qualified engineers, with over 1,500 satisfied customers across 25,000 buildings

A data-driven compliance programme backed by a historical audit trail of water temperatures and movement data

Overcome long-standing industry Legionella compliance challenges

Time consuming

Save time spent gathering compliance data and reduce remediation time.

High operational costs

Reduce energy bills, fees and non-access charges by embracing remote pipe monitoring. Avoid unrequired water heating and site visits.

Reactive response

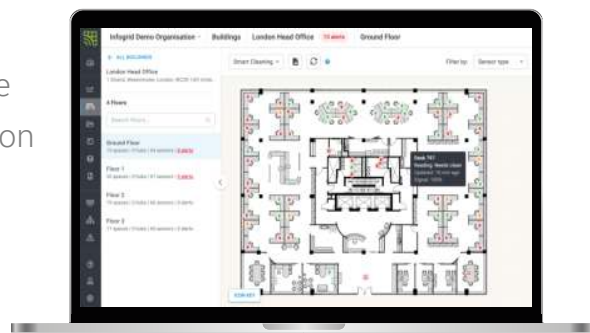

Identify temperature and movement issues as they arise. Get ahead of problems that are usually only detected on monthly checks. Avoid false positives and achieve more robust compliance.

High wastage

Save thousands of litres in water wastage by taking a data-driven approach to flushing and remediation. Reduce energy consumption on water heating and site visit travel mileage.

The Rock Compliance Way

- Your locations heat-mapped with real-time temperature and water movement detection
- Digital reporting that supplements site inspections, creating an audit trail of historical compliance
- Data, alerts and scheduled reports to identify issues as soon as they arise, for greater proactivity and peace of mind
- Data-driven diagnostics that target and reduce unnecessary pipe flushing

The solution that moves the needle on your sustainability initiatives

SAVE ENERGY

Reduce energy waste on water heating

SAVE WATER

Reduce water waste from unnecessary flushing

SAVE MILES

Reduce water travel and site visit frequency

Don't be L8 to embrace remote pipe monitoring www.rockcompliance.co.uk/rpm

Saved a national private
healthcare provider:
4,455,642 litres of water per annum
> £100,000 in annual water and
heating costs

Rock Compliance is a progressive company in the compliance market. We have three fundamental values: **minimising risk, delivering compliance** and **making it simple** for our clients. We achieve this by continually reducing actual risk through investigating root cause and taking the necessary action on the back of all non-conformances.

The result?

- An ongoing reduction in the number of non-conformances
- Low risk, compliant systems
- Minimised and predictable spend
- Highly satisfied customers who trust Rock Compliance with all their compliance needs
